

Agricultural Spray Machine

This agricultural spray machine is designed for efficient and precise spraying. It features a high-pressure pump and adjustable nozzles for uniform coverage.

Product Overview

Professional Agricultural Spraying Solution

The SFZ-30 series agricultural spray machine is engineered for precision and efficiency in professional farming environments. Featuring a robust construction and high-pressure capabilities, this unit is designed to handle demanding spraying tasks while maintaining uniform coverage. Its compact footprint and reliable pumping system make it a dependable asset for small to medium-sized agricultural operations.

Technical Specifications

Article Number	SFZ-30
Suction Capacity	24 L/min
Maximum Pressure	5 MPa
Power Rating	4 kW
