

Agricultural Water Pump for Irrigation

This water pump is designed for efficient fluid transfer in agricultural drainage and irrigation systems. Constructed from durable cast metal, it features a robust impeller and housing for reliable performance in demanding environments.

Product Overview

Professional Agricultural Irrigation Solution

The F106 water pump is engineered for high-efficiency fluid transfer within demanding agricultural drainage and irrigation systems. Built with robust cast metal, this unit features a high-performance impeller and reinforced housing designed to withstand harsh field environments. It delivers consistent pressure and flow rates, serving as a reliable asset for large-scale water management and crop hydration requirements.

Technical Specifications

Performance Capabilities

- Consistent flow rate delivery
- High-pressure output stability
- Durable impeller construction
- Reinforced housing for extreme conditions

Material Composition	Cast Metal
Core Applications	Agricultural Irrigation, Water Drainage, Fluid Transfer
