

Air Bearing Casters for Heavy Load Movement

Air casters require little pressure to move easily. These casters are designed for moving heavy loads with ease and precision.

Product Overview

Precision Heavy Load Movement

These air bearing casters provide a cost-effective and efficient solution for moving heavy industrial equipment. By utilizing compressed air to create a frictionless layer, they allow for effortless movement of massive loads with minimal pressure. Designed for durability, these systems offer a lifespan of over ten years and come as a complete, ready-to-use package.

Technical Specifications

Available Load Capacities

- 10T
- 16T
- 20T
- 32T
- 48T
- 60T

Customization

Yes

Application

Typical Applications

Precision Devices, Armamentarium, Printing Equipment, Electronic Sets, Heavy Machinery

Performance

Key Performance Metrics

10 Years
