

Air Circulation and Ventilation Fan

This electric fan is designed for air circulation and ventilation. It features a protective cage, multiple blades, and a stable base.

Overview

High-Efficiency Air Circulation

This electrical ventilation fan is engineered for optimal air circulation in both residential and commercial environments. Featuring a robust protective cage and aerodynamic blade design, it ensures consistent airflow and reliable performance. Its stable base and efficient motor make it an ideal solution for maintaining comfortable indoor air quality and temperature control.

Technical Specifications

Power Source	Electrical
Recommended Use	Indoor, Residential, Commercial

Design Features

Safety and Build

- Protective safety cage
- Multi-blade design
- Stable base construction
