

Air Conditioner Fan Blower Wheel Replacement

This replacement fan blower wheel is designed for air conditioning units. It is made from durable black plastic and features evenly spaced blades for optimal airflow and quiet operation.

Product Overview

High-Efficiency Replacement Blower Wheel

This replacement fan blower wheel is engineered for high-performance air circulation within air conditioning units. Constructed from durable black plastic, its cylindrical design features precision-spaced blades to ensure optimal airflow and quiet operation. The balanced construction minimizes vibration, making it an essential component for maintaining a comfortable and efficient indoor cooling environment.

Performance Metrics

Key Performance Features

0 Balanced

Low Vibration

0 Optimized

Quiet Operation

Technical Design

Material

Durable Black Plastic

Blade Design

Multiple evenly spaced blades for efficient air movement

Shape

Cylindrical

Application & Installation

Compatibility

- Various air conditioner models
- Standard AC ventilation systems
- Direct replacement for worn blower wheels

Installation

Easy-to-install replacement part

Primary Functions

Air Circulation, Cooling Efficiency, Ventilation
