

Air Conditioner Motor - 95 Series

This single-phase capacitor run asynchronous motor features a metal shell. It is designed for use with a single-phase AC power supply and offers step speed regulation.

Product Overview

High-Performance 95 Series Motor

The 95 Series Motor is engineered specifically for outdoor air-conditioning units, offering a robust and reliable solution for demanding climate control environments. Featuring a durable metallic housing and a vertically oriented shaft, this motor provides consistent power for essential air circulation and cooling tasks. Its compact form factor ensures seamless integration into a wide range of existing air-conditioning system designs.

Technical Specifications

Application

Outdoor Air-Conditioning

Series	95 Series
Mounting Method	Screw mount
Housing Material	Metallic
Shaft Orientation	Vertical
