

Air Conditioner Piping System

This air conditioner piping system is designed for directing airflow or liquid within an air conditioning unit. The construction uses white PVC material, ensuring durability and resistance to corrosion.

Product Overview

Professional HVAC Piping Solution

This air conditioner piping system is engineered for efficient condensate drainage and air distribution within HVAC units. Constructed from high-quality, durable white PVC, the system ensures long-lasting performance and resistance to corrosion in demanding environments. Its complex, vertical flow management design incorporates various fittings to support reliable operation in professional air conditioning setups.

Physical Properties

Color

White

Material

PVC

Durability Features

Corrosion-resistant, Durable

System Components

Included Fittings

- T-joints
- Couplings
- Valves

Primary Applications

- Condensate drainage
- Air distribution
