Overview

Reliable Industrial Power Source

This air-cooled, single-cylinder diesel engine is engineered for versatility and durability in demanding environments. With a displacement of 406cc, it provides a consistent power output suitable for a wide range of industrial applications. Its robust construction ensures long-lasting performance, making it an ideal choice for powering generators, water pumps, agricultural machinery, and construction equipment.

Technical Specifications

Displacement	406 cc
Cylinder Count	1
Cooling System	Air Cooled

Operational Features

Starting Methods	Manual Start, Electric Start
