

Air-Cooled V-Twin Diesel Engine

This 20kW air-cooled diesel engine features a two-cylinder, V-twin configuration. The robust construction ensures durability and reliability for power generation and other industrial applications.

Overview

Industrial V-Twin Diesel Power

This two-cylinder, V-twin, air-cooled diesel engine is engineered for reliable performance in demanding industrial and commercial environments. Featuring a compact design, it is ideal for heavy-duty applications such as power generation and industrial pumping. Its robust construction, combined with efficient high-pressure fuel injection, ensures long service life and optimal thermal management.

Technical Specifications
