

Air Filter Intake Hose

This air filter hose is designed for optimal air intake and filtration in automotive applications. Constructed from durable rubber, the hose ensures a secure and leak-free connection between the air filter and the engine.

Product Overview

Automotive Air Intake Solution

This high-quality air filter intake hose is specifically engineered for automotive air filtration systems. Constructed from durable, specialized rubber, the hose provides a secure and leak-free connection between the air filter and the engine. It is designed to withstand harsh engine bay environments, offering excellent resistance to corrosion, high temperatures, and material aging for long-lasting performance.

Technical Properties

Material	Automotive-grade Rubber
Resistance Capabilities	Corrosion Resistant, High Temperature Resistant, Aging Resistant

Application Details

Primary Application	Automobile air filter systems
Key Function	Facilitates secure air intake connection
