

Air Master Cylinder Assembly

This air master cylinder assembly is designed for automotive brake systems. It consists of a cylindrical booster unit connected to a valve mechanism, ensuring efficient brake performance.

Product Overview

Air Master Cylinder Assembly

This high-quality air master cylinder assembly is designed for reliable braking performance in automotive applications. It features a robust black cylindrical booster unit integrated with a precision-engineered silver-colored valve mechanism. The assembly comes complete with essential fittings, mounting bolts, and an integrated pressure sensor with pre-installed electrical wiring for straightforward installation.

Technical Specifications

Country of Origin

Korea

Part Number

58130 74011

Alternate Part Number

59130-74011

Manufacturing Date

2009-11-24

Lot Number

1011

Packaging Quantity

1 PC
