Product Overview

Innovative Bladeless Technology

This modern bladeless fan utilizes advanced air multiplier technology to create a powerful, smooth, and consistent airflow. Its aerodynamic design significantly minimizes turbulence for quiet operation, while the absence of rotating blades ensures maximum safety for homes with children or pets. The sleek, metallic aesthetic makes it a stylish addition to any professional or residential environment.

Key Features

Core Features

- Bladeless design for safety
- Integrated LED lamp
- Remote control operation
- Easy to clean surface
- Energy-efficient performance

Speed Adjustment

Stepless speed adjustment
