

# Air Powered Hydraulic Bottle Jack

This heavy-duty air bottle jack features a robust steel construction and air-powered hydraulic system. It is equipped with a safety overload valve and offers a wide lifting range for various vehicle heights.

## Product Overview

### Professional Air-Powered Lifting Solution

This heavy-duty air bottle jack is engineered for professional use in automotive repair, construction, and industrial environments. It features a robust steel construction for exceptional durability and longevity, paired with an efficient air-powered hydraulic system for effortless, reliable lifting. Designed with safety in mind, it includes an integrated overload valve to prevent damage and ensure secure operation during heavy-duty tasks.

## Technical Specifications

Material	Robust Steel
Power Source	Air-Powered Hydraulic

## Features & Safety

### Ideal Applications

- Automotive Repair
- Construction
- Industrial Applications

Safety Features	Overload Valve, Heavy-Duty Construction
-----------------	---

## Design & Portability

### Design Advantages

Compact Design • Portable • Wide Lifting Range
