

Air-Pressure Ventilating Fan

This metallic air-pressure ventilating fan is designed for air extraction and ventilation. It features a multi-blade impeller for efficient airflow and a protective grille for safety.

Overview

High-Efficiency Ventilation Solution

This metallic air-pressure ventilating fan is engineered for reliable air extraction and circulation in demanding environments. Featuring a robust multi-blade impeller design, it delivers consistent airflow while maintaining operational safety through an integrated protective grille. It is an ideal choice for professional applications requiring precise air pressure regulation and effective ventilation.

Technical Details

Model Number	VT-20 CF 5000N
Construction Material	Metallic
Key Design Features	Multi-blade Impeller, Protective Grille, Air Pressure Regulation

Application

Primary Applications

- Air extraction
- General ventilation
- Air circulation
- Pressure regulation
