

Air Purification System

This air purification system is designed for household use. It effectively removes pollutants and allergens to create a cleaner, healthier environment.

Product Overview

Professional Air Purification Solution

This air purification system is engineered to maintain high air quality standards in professional environments. Designed for efficiency and reliability, the unit effectively filters contaminants to ensure a cleaner workspace. Its robust construction makes it suitable for continuous operation in demanding settings.

Technical Specifications

Component Type	Cam Lock Mechanism
Material	Metal, Steel, Zinc Alloy
Mechanism Type	Rotating Cam

Features

Included Accessories

- 2 Keys
- Cylindrical housing
- Cam arm

Durability Features

Corrosion Resistant • Industrial Grade
