

Air Purifying Exhaust Fan with Anion Generator

This electrical fan and exhaust fan unit improves air quality and circulation. It features a soft-touch switch, a pollution sensor, and an anion generator to clean and release heated air.

Product Overview

Advanced Air Purification and Ventilation

This Air Purifying Exhaust Fan is engineered to significantly improve indoor air quality and circulation. Equipped with an integrated anion generator, the unit actively cleans the air while providing efficient ventilation. Designed for ease of use, it features a soft-touch switch and an intelligent sensor system that automatically detects polluted air, ensuring a healthier environment for household use.

Technical Specifications

Model Number	YTH-6A
Key Features	Anion Generator, Air Quality Sensor, Soft-touch Switch, Clean Heat Air
Primary Application	Household
Product Category	Air Conditioners and Ventilation Equipment
