Product Overview

Professional Airless Spray Tip

This reversible airless spray tip is engineered for consistent, high-quality paint application. Designed with a long-lasting fan pattern, it ensures uniform coverage while minimizing waste. The reversible mechanism allows for quick and easy clearing of clogs, significantly reducing downtime on the job site. Each unit includes a durable tip gasket to maintain a tight seal and peak performance during operation.

Technical Features

Key Features

- Reversible design for easy clog clearing
- Long-lasting fan pattern technology
- Includes essential tip gasket
- Compatible with various coating materials
