

Airport Luggage Trolley with Four Wheels

This luggage trolley is designed for use in airports and transportation hubs. It features four wheels and a double chassis for stability.

Product Overview

Professional Airport Luggage Trolley

This high-capacity airport luggage trolley features a robust double-chassis construction made from 2mm high-gauge stainless steel. Designed for heavy-duty transit environments, it offers a 300 kg load capacity and includes specialized marine-grade anti-rust treatments. The system ensures smooth maneuverability and durability with its high-precision ball-bearing wheel assembly.

Technical Specifications

Loading Capacity	300 kg
Frame Thickness	2 mm
Trolley Weight	24 kg

Dimensions

Body Dimensions (L x W x H)	960 x 610 x 1050 mm
Loading Area Length	780 mm
Nesting Distance	260 mm

Materials and Components

Castor Configuration

Position	Type	Diameter
Front	Swivel	160
Rear	Fixed	180

Special Features

Marine Grade Anti-Rust • High Precision Bearings • Hand Brake • Double Chassis

Material Composition	Stainless Steel, Polypropylene (PP), Natural Rubber, Polyamide Hub
