

AISI316L Stainless Steel Wire Rope

This stainless steel wire rope is made from AISI316L grade. It is available in 7x7 and 7x19 strand configurations for various applications.

Overview

High-Performance Stainless Steel Wire Rope

This AISI 316L stainless steel wire rope is engineered for exceptional durability and corrosion resistance, making it an ideal choice for demanding industrial and marine environments. Available in a wide variety of constructions and diameters, it provides reliable performance for rigging, construction, and metallurgical applications. Its superior material quality ensures longevity and safety, adhering to international standards for high-tensile strength requirements.

Technical Specifications

Diameter Range

0.3 mm

Minimum

32 mm

Maximum

Tensile Strength

- 1570 N/mm²
- 1670 N/mm²
- 1770 N/mm²

Surface Treatment

Bright • Annealed • Electro polished

Material Options

AISI 304, AISI 316, AISI 304L, AISI 316L, Non-magnetic

Construction & Standards

Available Constructions

- 1X7
- 1X19
- 7X7
- 7X19
- 6X7+FC/IWS
- 6X19+FC/IWRC/IWSC
- 19X7
- 6X37+FC/IWRC
- 6X36WS+FC/IWRC

Compliance Standards

AISI, ASTM, DIN, EN12385-4, BS, GB, JIS

Logistics & Usage

Primary Applications	Rigging, Construction, Aircraft, Metallurgy, Hardware
HS Code	7312100000
