

All-In-One Desktop Computer with Integrated Display

This all-in-one desktop computer features an integrated display, keyboard, and mouse. The system offers a compact design with a built-in webcam and front-facing buttons.

Product Overview

Streamlined Desktop Solution

This all-in-one desktop computer provides a professional and space-saving solution for modern business environments. The integrated design combines the processing unit with the display to reduce cable clutter and maximize desk space. With essential peripherals like an integrated webcam, keyboard, and mouse included, it offers a ready-to-use experience for office productivity and communication.
