

Alloy Steel Reel Cutter and Roller Set

This set includes precision-engineered alloy steel reel cutters and rollers. The reel cutters feature hardened blades for efficient and clean cutting of grass and vegetation.

Product Overview

Professional Turf Maintenance Solutions

This alloy steel reel cutter and roller set is engineered for high-performance turf maintenance in demanding environments like golf courses and sports fields. Crafted from durable 65Mn steel with a hardness of 50HRC, these components ensure long-lasting sharpness and consistent cutting performance. The set is designed to integrate seamlessly with standard reel mower equipment, promoting healthy turf growth through precise cutting and even weight distribution.

Technical Specifications

Material	65Mn Alloy Steel
Hardness	50 HRC

Compatibility & Application

Custom Fabrication

We offer design and fabrication services for various cutter blades based on customer-provided specifications, technical drawings, or physical samples. Our engineering team leverages over a decade of experience to develop tailored solutions for specific turf equipment requirements.

Primary Application	Golf Course Maintenance, Lawn Mower Blades, Professional Turf Management, Sports Field Maintenance
Customization	Yes
