

Aluminum Alloy LED Integrated Fixture

This integrated LED fixture features an aluminum alloy construction for durability and efficient heat dissipation. It provides bright, uniform illumination suitable for commercial and residential settings, offering energy-efficient lighting solutions.

Product Overview

Professional Lighting Solution

This Aluminum Alloy LED Integrated Fixture is designed for high-performance commercial and office environments. It features a robust aluminum alloy construction that ensures excellent heat dissipation and corrosion resistance. The unit provides uniform, stroboscopic-free illumination while offering significant energy savings compared to traditional lighting solutions.

Technical Performance

Power Supply	Constant Current
Energy Efficiency	50% higher efficiency than ordinary lamps
Max Connection Distance	6 M

Physical Characteristics

Material	Aluminum Alloy
Key Features	Noise-free, No stroboscopic, High temperature resistance, Corrosion resistance, High light transmittance

Applications

Suitable Environments

- Large Offices
- Meeting Rooms
- Department Stores
- Specialty Stores
- Showrooms
- Schools
- Hospitals
