Product Overview

High-Performance Aluminum Alloy Lever Block

This aluminum alloy lever block is a robust and efficient lifting solution designed for demanding construction, manufacturing, and maintenance environments. Engineered for reliability, it features a durable lever mechanism and secure hook attachments to facilitate safe load handling. Its compact and lightweight design ensures portability without compromising on lifting power, making it an essential tool for professional lifting and pulling applications.

Technical Specifications

Maximum Lifting Capacity

4500 kg
Max Capacity

Maximum Lifting Height	3 m
Power Source	Hand Chain
Sling Type	Chain

Certifications & Compliance

Certifications	CE
----------------	----

Logistics & Support

Packaging

- Carton
- Wooden case

Warranty

1 year

Delivery Lead Time

15 days after order confirmation
