

Aluminum Electronic Component Enclosure

This custom fabricated aluminum enclosure is designed for housing electronic components. It features mounting holes, ventilation slots, and tabs for secure mounting.

Product Overview

Custom Fabricated Aluminum Enclosure

This custom fabricated aluminum enclosure is engineered specifically for housing sensitive electronic components. Constructed from lightweight sheet metal, it offers an ideal balance of durability, structural integrity, and effective heat dissipation. The design includes versatile mounting options and ventilation features, making it a robust, shielded solution for various professional electronic applications.

Technical Specifications

Material	Aluminum Sheet Metal
Key Features	Lightweight, Heat Dissipation, Shielded Housing, Ventilated

Design & Mounting

Mounting Features

- Top surface mounting holes
- Bent tabs for system integration

Ventilation	Slotted side panels for airflow and cable routing
