

Aluminum Hand Operated Oil Transfer Pump

This aluminum hand oil pump is designed for efficient transfer of oil and other non-corrosive fluids. Its robust construction and smooth rotary action ensure durability and consistent flow in demanding environments.

Product Overview

Efficient Fluid Transfer

This aluminum hand-operated oil transfer pump is engineered for the reliable and efficient transfer of oil and other non-corrosive fluids. Featuring a robust, durable construction, it is designed to withstand the rigors of demanding environments like workshops, garages, and industrial settings. The smooth rotary action ensures consistent flow and ease of operation for professional users.

Technical Specifications

Ideal Applications

- Workshops
- Garages
- Industrial settings

Material	Aluminum
Operation Type	Hand-operated rotary
Fluid Compatibility	Oil, Non-corrosive fluids
