

Aluminum Oxide Delta Sanding Sheets

Delta sanding sheets are made with aluminum oxide abrasive for detail sanding work. Their triangular shape allows access to corners and edges, while the perforated design supports dust extraction.

Product Overview

Professional Delta Sanding Sheets

These premium aluminum oxide delta sanding sheets are designed for versatile, high-performance sanding tasks. Featuring a durable resin-bonded open coat, they are ideal for working with hardwoods like oak and pine, as well as various building boards such as plywood. The integrated 6-hole pattern and front-side punching ensure efficient dust extraction, promoting a cleaner workspace and extending the abrasive's service life.

Technical Specifications

Abrasive Material	Aluminum Oxide
Coating Type	Open Coat
Bonding Agent	Resin on Resin
Dust Extraction System	6-Hole Pattern

Applications

Compatible Materials	Oak, Pine, Plywood, Hardwoods, Building Boards
----------------------	--

Features

Key Features

- Premium resin-bonded aluminum oxide
- 6-hole configuration for superior dust extraction
- Resin-on-resin bond for durability
- Front-side punching for enhanced dust control
