

Aluminum Straight Edge Ruler

This aluminum straight edge ruler features both metric and imperial scales for accurate measurements. Its durable construction ensures long-lasting performance in various applications.

Product Overview

Professional Aluminum Straight Edge Ruler

This precision aluminum straight ruler is designed for accuracy and durability in demanding professional environments. Featuring both metric and imperial scales, it provides versatile measurement capabilities for engineering, drafting, and general construction tasks. Its robust 2.0 mm thick construction ensures long-lasting performance and resistance to bending during daily use.

Physical Dimensions

Available Lengths

- 200
- 300
- 400
- 500
- 600
- 800
- 1000
- 1200

Thickness	2 mm
Width	30 mm

Material & Build

Material	Aluminum
Suitable Applications	Engineering, Drafting, Construction, DIY Projects
