Product Overview

High-Performance Polishing Solution

This high-quality polishing wheel is engineered specifically for use with standard angle grinders. Featuring a durable construction with a white felt polishing surface bonded to a robust green plastic core, it is designed to deliver consistent results. It is an ideal tool for achieving smooth, professional finishes on a diverse range of materials, including metals, plastics, and composites.

Technical Specifications

Suitable Materials

- Metal
- Plastic
- Composites

Key Features

Durable Construction • Efficient Polishing • Easy Mounting

Material Composition

White Felt, Plastic Core

Compatibility

Standard Angle Grinder Spindles
