Professional Animal Feed Production Line

This advanced animal feed pellet production line is engineered for high-efficiency manufacturing of pet and livestock food. Designed with modern processing technology, the system supports versatile formulations, including cored-filling treats, to meet evolving market demands for nutrition and palatability. The complete line integrates mixing, extrusion, drying, and flavoring stages to ensure consistent, high-quality output.

Performance & Capacity

Available Capacities

- 150 kg/h
- 240 kg/h
- 500 kg/h
- 1 ton/h
- 2 ton/h
