

Animal Feed Pellet Production Line

This machine specializes in producing animal feed pellets for animals such as chickens, pigs, ducks, geese, fish, sheep, and cattle. The feed pellet production increases feed use rate and reduces waste.

Product Overview

Efficient Animal Feed Production

This professional-grade pellet production line is engineered for high-efficiency manufacturing of animal feed for various livestock, including poultry, cattle, and sheep. The system supports a comprehensive process from raw material cleaning to final packaging, ensuring high-quality, durable pellets with improved nutritional absorption. Designed for versatility and durability, the line features wear-resistant alloy components and a compact footprint suitable for diverse farming and commercial operations.

Key Features

 <p>HEXIE Hammer Mill</p>	 <p>HEXIE Pellet Mill</p>	 <p>HEXIE Cooler</p>	 <p>HEXIE Packing machine</p>
<p>Primary crushing stage using a high-capacity hammer mill.</p>	<p>Central pelletizing unit designed for consistent output.</p>	<p>Cooling system for temperature reduction of freshly pressed pellets.</p>	<p>Final packaging stage for efficient storage and distribution.</p>

Production Process

- Raw material receiving and cleaning
- Crushing (Hammer mill)
- Mixing (Feed mixer)
- Pelletizing (Pellet mill)
- Cooling (Counter flow cooler)
- Crumbling (Roller crusher)
- Sifting (Vibratory/Rotary sizing)
- Automated packing

Application Compatibility

Animal Feed, Soft Wood Pellet, Organic Fertilizer

Technical Specifications

 **HEXIE**

High-quality pellets suitable for various animal feeds.

Available Pellet Diameters

- 2.0mm
- 3.0mm
- 3.5mm
- 4.5mm
- Up to 18.0mm

Logistics

Origin & Shipping

Category	Details
Place of Origin	China
Packaging	Standard Export Wooden Case
Transport Options	Ocean, Land
