

Antistatic Abrasive Roll for Non-Ferrous Metal Grinding P180 Grit

Antistatic abrasive roll designed for grinding non-ferrous metals, featuring a P180 grit for efficient material removal. Its durable backing ensures extended use and a consistent finish on metal surfaces, making it suitable for electric tools and accessories.

Product Overview

Professional Grade Abrasive Solution

This antistatic abrasive roll is specifically engineered for precision grinding on non-ferrous metals. With a P180 grit, it offers an optimal balance between efficient material removal and achieving a consistent, high-quality surface finish. The durable backing ensures extended product life, making it a reliable choice for both industrial manufacturing and demanding DIY applications.

Technical Specifications

Key Features

Antistatic • Durable Backing • Industrial Grade

Grit Size	P180
Suitable Materials	Non-ferrous metals

Usage

Compatible Tools

- Electric grinding tools
- Manual sanding blocks
- Compatible accessories
