

API Flanged Globe Valve with Handwheel

This globe valve is suitable for applications in oil fields, the chemical industry, and coal mines. It is also applicable for environmental protection purposes.

Overview

Industrial API Globe Valve

This API-compliant flanged globe valve is engineered for precise flow regulation in demanding industrial pipeline applications. Featuring robust manual handwheel operation, it allows operators to easily adjust disc positioning for accurate flow control. Constructed from durable materials, this valve ensures reliable performance and longevity in various process environments.
