

Apparel and Textile Machinery Loudspeaker

This loudspeaker is designed for apparel and textile machinery applications. It features robust construction for durability in industrial environments and delivers clear audio output.

Product Overview

Industrial Audio Performance

This high-performance loudspeaker is specifically engineered for integration into apparel and textile machinery environments. Built with a robust design, it ensures longevity and reliable operation despite the rigorous demands of industrial settings. It delivers clear, consistent audio output, providing a seamless solution for communication and signaling within automated factory lines.

Technical Performance

Key Metrics

100 W RMS
Power Handling

90 dB
Sensitivity

4 Ohms
Impedance

Frequency Response

60Hz - 20kHz

Physical Construction

Component Details

Component	Specification
Voice Coil Diameter	1.5 inches
Magnet Weight	20 oz
Mounting Depth	3 inches

Materials

Polypropylene Cone, Rubber Surround
