

Apparel, Shoe, and Accessory Manufacturing Machine

This industrial machine is designed for use in garment, shoe, and accessory manufacturing. It features a robust frame with a horizontal pressing or cutting mechanism.

Product Overview

Industrial Manufacturing Solution

This specialized industrial machine is engineered specifically for high-efficiency operations within the apparel, footwear, and accessory manufacturing sectors. Featuring a robust steel frame construction, it ensures durability and stability during intensive production cycles. The equipment is designed to streamline manufacturing workflows, offering a reliable solution for pressing or cutting processes.

Technical Specifications

Design Features

- Robust steel frame
- Horizontal pressing/cutting mechanism
- Integrated cabinet base

Frame Material	Steel
Primary Industry	Apparel Manufacturing, Footwear Production, Accessory Manufacturing

Compliance & Quality

Quality Certifications
