

Appliance Motor for Blenders, Coffee Makers, and Juicers

High-performance electric motor designed for use in blenders, coffee makers, and juicers. This motor features a robust construction with a metal housing and a durable rotor.

Overview

High-Performance Appliance Motor

This robust electric motor is engineered specifically for demanding kitchen applications, including blenders, coffee makers, and juicers. Featuring a durable metal housing and a high-efficiency rotor, it is designed to provide consistent torque and optimal speed for blending, grinding, and juicing tasks. Its versatile design ensures easy integration into various appliance configurations, offering long-lasting reliability for professional-grade equipment.

Technical Specifications

Construction Materials

- Metal housing
- Durable rotor

Performance Characteristics

Optimized Torque • High Speed • Reliable Operation

Compatible Appliances

Blenders, Coffee Makers, Juicers
