

Aseptic Milk Packaging Machine

This machine is designed for aseptic packaging of beverages like milk. It utilizes laminated paperboard to create single-serve portions with extended shelf life.

Product Overview

Aseptic Packaging Solution

This advanced aseptic packaging machine is engineered for the high-speed filling and sealing of liquid dairy products. Designed to maintain product sterility, it utilizes laminated paperboard technology to ensure long-term shelf stability for UHT-treated milk. The system is optimized for single-serve portion packaging, providing a reliable and hygienic solution for beverage production lines.

Technical Capabilities

Material Compatibility

- Laminated Paperboard
- Aseptic Barrier Films

Packaging Format

Aseptic, Single-serve, Paperboard, UHT Compatible

Performance Metrics

Shelf Life Support

Long Shelf Life • Sterile Environment
