

Asphalt Paver

This paver is designed for efficient and precise asphalt paving. It features a high-capacity hopper and hydraulically adjustable screed for variable paving widths and depths.

Product Overview

High-Performance Asphalt Paving Solution

This asphalt paver is engineered for reliability and high efficiency in demanding construction environments. Featuring a powerful 186kW engine and a high-capacity 15.5-ton hopper, it ensures continuous material flow and consistent paving quality. The machine incorporates advanced flexible starting technology to protect mechanical components and includes a 9-meter hydraulic telescopic ironing plate for versatile paving operations.

Engine & Performance

Engine Power

186 kW

Power Output

Emission Standard	National 3
Flexible Starting Technology	Yes

Material Handling

Hopper Dimensions

- 2.5m Length
- 3.8m Width

Hopper Capacity	15.5 t
-----------------	--------

Paving System

Max Paving Width	9 m
Screed Heating Type	Electric

Design & Ergonomics

Transport Features	Foldable Roof, Foldable Exhaust
Operator Environment	Large side visor for improved visibility
