

Astronomical Reflector Telescope with Tripod

This reflector telescope is designed for astronomical observations and terrestrial viewing. It features an optical tube assembly with adjustment rings and a tripod with adjustable legs for precise height adjustments.

Product Overview

Professional Astronomical Telescope

This high-performance astronomical reflector telescope provides exceptional clarity for both celestial observations and terrestrial viewing. Designed with a robust tripod system, it features adjustable legs and a geared center column for precise height management and stability. The inclusion of an integrated finder scope ensures professional-grade target acquisition for amateur and advanced astronomers alike.

Optical Specifications

Optical System	Reflector
Targeting	Finder Scope, Adjustment Rings

Mount & Stand

Adjustment Mechanism

- Adjustable tripod legs
- Geared center column

Precision

High Stability • Precise Height Adjustment

Mount Type	Adjustable Tripod
