

ATB General Purpose Wood Saw Blade

This ATB (Alternate Top Bevel) saw blade is designed for general-purpose wood cutting. It features precision-ground carbide teeth to provide clean, efficient cuts and ensure an extended blade life.

Overview

High-Performance Wood Cutting

This ATB (Alternate Top Bevel) saw blade is engineered for versatile, general-purpose wood cutting applications. Featuring precision-ground carbide teeth, it delivers clean, efficient cuts while ensuring extended blade longevity. The design is optimized to minimize splintering and tear-out, making it an excellent choice for achieving a smooth finish on hardwoods, softwoods, and plywood.

Technical Details

Blade Configuration	ATB (Alternate Top Bevel)
Compatible Materials	Hardwood, Softwood, Plywood

Performance Features

Performance Benefits

- Precision-ground carbide teeth
- Reduced splintering and tear-out
- Extended blade life
- Smooth finish quality

Applications

Suitable Applications

Professional Use • DIY Projects
