

Audio Buzzer and Trumpet Speaker

This audio device combines buzzer and trumpet speaker functionalities. It is engineered for clear and efficient sound projection in diverse applications.

Product Overview

High-Fidelity Audio Amplification

The HA-2 is a professional-grade headphone integrated stereo amplifier engineered for superior audio reproduction. Featuring a robust, compact enclosure with optimized ventilation for heat dissipation, it ensures reliable long-term performance. The unit provides dual headphone output jacks and precise volume control, making it an ideal solution for high-fidelity monitoring and listening environments.

Technical Specifications

Enclosure Features

- Compact form factor
- Top-side ventilation holes
- Side-side ventilation holes

Headphone Outputs

2 ports

Interface Controls

Power Switch, Volume Control Knob, On/Off Indicators
