

Audio Buzzer and Trumpet Speaker

This is a combination audio buzzer and trumpet speaker. It is designed for integration into audio projects and musical instruments.

Product Overview

High-Precision Audio Buzzer and Trumpet Speaker

This precision-engineered audio buzzer and trumpet speaker mechanism is designed for high-quality sound reproduction across a variety of audio projects. Built with durable components and precisely tuned for optimal clarity, it offers a compact, reliable solution for integration into musical instruments and electronic systems. Its robust design ensures long-lasting performance in demanding technical applications.

Physical Dimensions

Length	50.5 mm
Width	31.5 mm
Height	44.5 mm
Component Diameter	21 mm

Key Features

Build Quality

Durable Construction • Precision Tuned • High-Clarity Audio

Suitable Applications

Audio Projects, Musical Instruments, Signal Systems
