

Audio Buzzer

This is an audio buzzer. It is designed to produce sound signals.

Product Overview

Industrial Audio Buzzer

This electro-mechanical audio buzzer features a sophisticated reciprocator mechanism with a spring-loaded plunger for precise performance. Designed for durability, the unit is constructed from a combination of robust aluminum and high-quality black composite materials. It is engineered for reliable operation in various industrial applications and includes a cylindrical housing with integrated mounting points for seamless system integration.

Technical Specifications

Construction Materials

- Durable Aluminum
- Black Composite

Core Metrics

1 levels

Adjustable Settings

Mechanism Type

Electro-mechanical, Reciprocator, Spring-loaded

Housing Configuration

Cylindrical with integrated mounting points
