

Australian Standard 15A Power Cord

This SAA approved power cord is designed for Australian electrical standards. It is suitable for high-current applications up to 15A and provides a secure and reliable power connection.

Product Overview

Heavy-Duty Australian Standard Power Cord

This heavy-duty power cord is engineered specifically for Australian electrical standards, featuring the standard AS/NZS 3112 three-prong plug configuration. Certified with SAA approval, it is built to handle demanding power requirements up to 15A and 250V. Designed for durability and safety, this cable is an ideal solution for high-current applications, including industrial tools, appliances, and professional equipment.
