

Auto Darkening Welding Helmet

The auto-darkening welding helmet protects the eyes and face from sparks, spatter, and harmful radiation during welding and grinding. It features an auto-darkening filter (ADF) that automatically darkens when an arc is struck.

Product Overview

Professional Protection

This auto-darkening welding helmet is engineered to provide comprehensive protection for eyes and face against sparks, spatter, and harmful radiation. It features an advanced auto-darkening filter (ADF) that reacts instantly when an arc is struck, ensuring safety during welding and grinding. Designed for comfort and durability, the helmet is constructed from impact-resistant materials and includes fully adjustable headgear for a secure, personalized fit.

Technical Features

ADF Technology	Yes
Adjustable Settings	Sensitivity, Delay

Compatibility

Supported Welding Processes

- MIG Welding
- TIG Welding
- Stick Welding
- Grinding

Design & Build

Material

Lightweight • Impact-Resistant

Headgear	Adjustable for personalized fit
