

Auto Darkening Welding Helmet with Adjustable Shade

This auto darkening welding helmet is designed for optimal eye and face protection during welding operations. It features adjustable shade control, sensitivity and delay settings for customized performance.

Product Overview

Professional Welding Protection

This auto-darkening welding helmet is engineered to provide superior eye and face protection for professional welding environments. It features highly customizable settings, including adjustable shade control, sensitivity, and delay, allowing operators to fine-tune performance for specific tasks. Constructed from durable yet lightweight materials, it ensures comfort during extended use while offering comprehensive shielding against sparks, spatter, and harmful radiation.

Technical Specifications

Key Protection Features

- Auto-darkening filter
- Spark protection
- Spatter resistance
- Harmful radiation shielding

Adjustable Controls

- Shade control
- Sensitivity adjustment
- Delay settings

Compatible Welding Processes

MIG, TIG, Arc Welding

Design and Comfort

Construction

Durable • Lightweight
