Product Overview

High-Performance Engine Piston

This precision-engineered engine piston is designed specifically for the Lada Niva 1700 engine platform. Manufactured to meet demanding automotive standards, it features an optimized 82mm diameter and a lightweight 343g construction to ensure efficient engine responsiveness. Ideal for the Russian automotive market, this component offers reliable combustion performance and durability for long-term engine health.

Technical Specifications

Part Number	21213-1004015
Diameter	82 mm
Weight	343 g

Compatibility

Compatible Vehicle Models	Lada Niva 1700
