

Auto-Feed Gear Head Drilling Machine

This gear head auto-feed drilling machine is designed for precise drilling. It features a gear-driven head for efficient power transmission and an auto-feed mechanism for consistent drilling depth.

Product Overview

Precision Gear Head Drilling

This gear head auto-feed drilling machine is a robust and versatile tool designed for precision drilling operations. It features a powerful motor and a gear-driven head for smooth, efficient power transmission. The integrated auto-feed mechanism ensures consistent drilling depth while reducing operator fatigue, and the machine includes a sturdy, vertically adjustable worktable to accommodate various workpiece sizes.

Technical Specifications

Transmission	Gear hardened
Motor Configuration	2-speed motor
Torque	Large driven torque
Spindle Speed Range	Wide range

Features

Key Features	Auto-feed mechanism, Gear-driven head, Integrated coolant system, Adjustable worktable
--------------	--

Safety

Safety Features

- Emergency stop button
- Chuck guard

Applications

Suitable Applications

Metalworking • Woodworking • General Drilling
