

Automated Brass Butterfly Valve for Flow Control

This butterfly valve is designed for industrial applications requiring precise flow control. It features a robust brass construction for durability and corrosion resistance.

Product Overview

Automated Brass Butterfly Valve

This butterfly valve is engineered for industrial applications that require precise flow control and reliable performance. Constructed from robust brass, it offers excellent durability and corrosion resistance in demanding operating environments. Equipped with an automated actuator, this unit allows for efficient remote operation and accurate positioning across a variety of fluid types.

Technical Specifications

Material	Brass
Operation	Automated Actuator
Key Features	Corrosion Resistant, Remote Operation, Precise Positioning, Industrial Grade
