

# Automated Floor Cleaning Robot

This automated floor cleaning robot is designed for residential environments. It is equipped with a main brush, side brush, and wheels for navigation.

## ADDITIONAL IMAGES

## Product Overview

### Smart Automated Floor Cleaning

This advanced robotic vacuum features high-precision laser navigation to ensure efficient coverage of your floor space. Designed for versatility, it includes an auto-adjusting cleaning head that adapts to various floor surfaces. With integrated vacuuming and mopping capabilities, it provides a comprehensive cleaning solution that is easy to manage via Wi-Fi controls.

## Performance Metrics

### Suction Power Levels

**2200 Pa**

Standard Suction

**4000 Pa**

High Suction

**8000 Pa**

Ultra-Strong Suction

## Technical Features

Cleaning System	Vacuuming, Mopping, Smart Auto-Boost
Connectivity	Yes
Mopping System Type	Electric Water Control

## Design and Navigation

Navigation System	Advanced Laser Navigation
Design	Circular
