

Automated Granular Product Packaging Line

This automated system is designed for high-speed processing of granular or small products. It integrates a vertical conveyor, multi-head weigher, and packaging unit for efficient operation.

Overview

High-Efficiency Automated Packaging Solution

This automated packaging line is engineered for the high-speed processing of granular and small-sized products. Featuring a vertical conveyor system, a precision multi-head weigher, and an integrated packaging unit, it ensures consistent and accurate output. Built with durable stainless steel and controlled by an advanced programmable logic controller (PLC), this system offers the flexibility required for diverse packaging formats in food, pharmaceutical, and chemical applications.

Technical Specifications

Construction Material	Stainless Steel
Control System	Programmable Logic Controller (PLC)
Suitable Industries	Food Industry, Pharmaceutical Industry, Chemical Industry

Key Features

System Components

- Vertical conveyor system
- Multi-head weigher
- Integrated packaging unit

Operational Flexibility	Yes
